

GREENLEAF QUARRY

Contractors who handle slurry, broken pavement, old bricks, tree stumps and other waste materials often need to dispose of these products at dumpsites. They want a quick, cost-effective disposal solution that is environmentally friendly. They prefer not to place the refuse in landfills and take up valuable space. B.E.S.T. Enterprises provides an affordable waste-disposal solution. B.E.S.T. Enterprises efficiently manages waste materials like slurry, concrete, bricks, block, and asphalt. Thus, contractors have an approved dumpsite to drop their waste and pick up recycled materials.

RECYCLING & MATERIAL RECOVERY

In 2009, B.E.S.T. Enterprises purchased an abandoned, 40-acre quarry in Greenleaf, Wisconsin. The quarry is a Wisconsin Department of Natural Resources Stormwater Approved dumpsite where we accept many different types of waste. The refuse is crushed, processed and then sold to contractors for use on other projects. The quarry is open year-round to accommodate contractors' needs.

ACCEPTED MATERIALS FOR RECYCLING & REUSE

Fill Material

Clean Soil

Brick & Building Stone

Spoils from Slurry, Sand, Gravel or Stone

Concrete & Reinforced Concrete
(not painted with lead-based paint)

Wood, Brush, Stumps
(not painted with preservatives or lead-based paint)

Concrete & Broken Pavement

REPURPOSING GRANITE COUNTERTOP WASTE

At the Greenleaf quarry, we also produce "Take It For Granite", a product made by crushing the waste generated from custom countertop manufacturing. We crush and screen granite countertop waste, so it can be repurposed as landscaping stone around homes and businesses. Contractors can dump a load of concrete or asphalt and reload with landscape stone or other materials that they need back at the jobsite. The ability to unload and reload in the same trip increases efficiency and decreases trucking costs.

DISPOSING OF SLURRY YEAR-ROUND

Additionally, B.E.S.T. Enterprises accepts slurry loads from wet vac trucks and trailers year-round. We offer an environmentally friendly, convenient dumpsite for varying volumes of slurry.

QUARRY PRICES

EFFECTIVE MARCH 1, 2026

DESCRIPTION	UNIT PRICE	UNIT
***The below items are from our Greenleaf Quatry located at 1829 Day Street, Greenleaf, WI 54126.

(seasonal hours apply). Contractor discounts available.
Please check ahead during inclement weather.

Pricing & Services

- Prices do not include applicable sales tax
- Aggregate pricing includes loading and scaling
- Dumping fees include leveling of material
- All material is subject to availability
- Each load requires its own scale ticket unless otherwise arranged

Agreements & Payment Terms

A signed Fill Agreement and proof of required insurance must be on file prior to dumping. Forms are available on our website under the Quarry section or by contacting our office.

Invoices are issued monthly and are due Net 10. Accounts exceeding 30 days may require prepayment. Credit cards are accepted (processing fees apply). For convenience, customers may set up automatic monthly payments or prepay a credit balance. First-day service may require prepayment.

A Cornerstone of Greenleaf History

Stone quarrying in Greenleaf dates back to the 1870s, when early quarries supplied foundation stone for homes, farms, and businesses throughout the area. Limestone was burned into quicklime for mortar—an essential building material that helped shape early construction in the region.

Over the decades, the quarry passed through several owners, each contributing to its continued operation and success. Under the name Greenleaf Stone Company, the site became well known for producing crushed stone used in road building and local infrastructure—quite literally paving the way for progress.

Since 2015, the property has been owned by BEST Enterprises, LLC. While large-scale mining activity has slowed, the site continues to serve an important role by providing a location to recycle, repurpose, and responsibly manage construction-related materials, extending the working life of a site that has supported the community for generations.
